Dhruvsoft's Services

Advisory Services

We work with customers during the initial Discovery phase to evaluate existing processes, help design new processes, and come up with the best ERP solution for meeting the organization's needs.

NetSuite ERP implementation

Our NetSuite implementation services offering provides one of the fastest return on investment (ROI). With our in-depth functional expertise - we offer solutions based on best practices which are tailored for your unique business need.

NetSuite Customization

Deriving the full potential of NetSuite ERP requires extending the functionality beyond the declarative configuration by development of custom features. While doing so, we ensure that the developed components scale with the business and upgrade without rework. We have extensive experience on NetSuite customization and development.

Data Migration

We offer end to end data migration services including the data extraction, data cleansing, data de-duplication and data migration. We have extensive experience in handling complex data relationships and migration of data from multiple sources.

Custom Integration

The greatest advantage of NetSuite ERP is ease of integrations that its cloud technology and APIs bring. We have a strong capability of integrating NetSuite ERP with other Applications such as CRM systems like Salesforce.com, legacy systems, Business intelligence, Data warehouse and Marketing Automation Applications.

Global deployment and Localization

If you are implementing NetSuite ERP across you offices in multiple countries- you can depend on us for Global deployment and Localization services. We have extensive experience global deployment and consolidation using NetSuite OneWorld.
